BACKGROUND OF THE COLLOQUIUM

The SDG Goals of the United Nations are based on the challenging and pressing problems of the World. The first goal seeks to End Poverty in all its forms everywhere within 2030 and focusing on sustained prosperity for all. It is important to address poverty because 589 million people live in extreme poverty around the World. When SDG: 1 Ending Poverty is addressed which would also solve other challenging problems of the World. Since Poverty is interlinked with other problems it should be addressed comprehensively. World Public Sector Report 2015 recommends for five fundamental transformations to end poverty 1) Leave No One Behind 2) Put Sustainable Development at the Core 3) Transform Economies for Jobs and Inclusive Growth 4) Build Peace and Effective, Open and Accountable Institutions for all 5) Forge a New Global Partnership.

Poverty has various dimensions and promotion of livelihoods would also address poverty. The livelihood capitals are important to take up livelihood a activity which helps to reduce the poverty. Bringing Transformation in the lives of the poor is most important to lead and act with courage in terms of empowering poor households with dignity and authority. We are called to embrace change. Change in our societies. Change in the management of our economies. Change in our relationship to enhance social justice and to end poverty

Social injustice occurs in a society where the equals are treated unequally and the unequal are treated equally. There is huge gap between awareness and implementation in meeting out the real need of the communities. It has created Imbalanced growth across the regions and countries.

All nations are exhorted by UN to take steps on "shared prosperity for all" and to have a push for coherent action in social, economic, environment and political spheres aimed at poverty eradication, decent work for all and social integration in consideration of social justice and human rights.
