About The FDP

Innovative teaching pedagogies are the requirement in today's functional society. Becoming literate in how the technical world works are equivalent to reading, writing, and doing maths or solving problem. We need to look at this fourth literacy as mainstream. Innovative teaching pedagogies don't always mean introducing the latest and greatest technology into the classroom. Instead, innovative teaching is the process of proactively introducing new teaching strategies and methods into the classroom. The purpose of introducing these new teaching strategies and methods is to improve academic outcomes and address real problems to promote equitable learning. The FDP will empower the faculty members to manage challenges in today's modern educational world and whatever the future will bring is the core objective of the National Curriculum Framework.
